## SALESMAN CONDUCTS TECHNICAL SEMINAR IN DALLAS, TEXAS

Rod Nickel, salesman, was recently invited to present a technical seminar on CU Structural Soil® for the Dallas chapter of ASCE (American Society of Civil Engineers) following their luncheon on Wednesday, January 27, 2010. Twenty-five civil engineers attended.

This informative presentation covers the purpose and justification of CU Structural Soil® and provides specific details about the composition, technical aspects, surface materials, installation and counterfeit awareness.

CU Structural Soil® is an innovative medium installed under pavement. It improves street tree vigor and prevents sidewalk failure, frequent pavement repair, eliminates tripping lawsuits and the replacement of dead trees every 7-10 years.

Mr. Nickel has presented this topic to a number of municipal authorities, civil engineer and landscape architect firms in this region, including: the cities of Dallas, Irving and Frisco, Texas; Alexandria, Louisiana; SWA Group, Dallas and Houston; Hayden Consultants, Dallas; Gratr Landscapes, San Antonio; MWM Design Group, Austin; Jacobs Carter Burgess, Dallas/Fort Worth; and Mesa Design Group, Dallas.

If you would like more information or to schedule a technical seminar on CU Structural Soil®, please contact Mr. Rod Nickel at (405) 343-7877.

### Pond Expert Continues Training

January 13, 2010 - Dallas, Texas - Jerry Brazell, resident Pond Champion at our Santa Fe location, was recently invited to attend a seminar called "Creating Opportunity with Sustainable Landscapes". The seminar was presented by Ed Beaulieu, Chief Sustainability Officer of Aquascape® Inc. The classroom seminar was designed to launch Aquascape's international Green Community Movement, which is intended to encourage and reward communities who adopt sustainable practices.

# JOB SPOTLIGHT

## *Mathena Mix*

Mathena Energy Services designed their own mix of 6", 8" and 12" Sugarloaf Chop for their new complex in El Reno, OK. Minick Materials provided approximately 3200 square foot, or 75 tons to Masonry Services to complete this project in 2009. Salesman, Bryan Moore.

## PROSTONE E-Z FIT VINTAGE WINE

CBR Commercial Contracting remodeled this retail center at 9500 N. May Avenue in Oklahoma City. They used over 3600 square feet of flats and 900 linear feet of corners. Salesman, Bryan Moore.
