

- MATERIALS NEEDED:**
- ☐ Landscape fabric
  - ☐ Decorative rock in multiple sizes

## INSTRUCTIONS

- 1** Dig out area for creek bed if you're not using an already cleared area
- 2** Lay down landscape fabric to prevent vegetation growth underneath
- 3** Fill the area about 4" deep with your mid-sized stones (2-4" in size is great. If your area has a lot of water runoff use more angular stones to prevent washout)
- 4** Randomly place larger stones (4-8") for more natural look
- 5** Use small stones to fill in any gaps between larger stones. Make sure to cover all of the fabric beneath to prevent deterioration from the sun

*Disclaimer: This is just one way to create a simple version of this project, and is not the only way to do so. Consider doing your own research, or watching instructional videos for more detailed instructions.*
